

SPACEDOCK

MOBILE EXPANDER

Designed by

THESIS

What is it?

Spacedock is your essential add-on to your ultraportable laptop and mobile phone. Spacedock has one USB type-C port for input power and connectivity, and gives four high-speed USB3.1 type-A ports, a micro-SD and SDXC card reader, one mini DisplayPort (mDP 1.2 video output, up to 4K display resolution), one micro-HDMI type D port. It makes your brand-new ultraportable laptop compatible with all your other media devices.

It's a connectivity hub. It's a power-bank. It's a data-bank.

Spacedock has a built-in 2600mAh lithium ion battery as a power bank to charge any smartphone, the USB-C port also acts as an OTG databank for your smartphone with on-board 512Gb of memory storage. The one-button back-up clones any plugged-in thumb drive or SD card. Plug your power cord into the on-board USB-C port. the smart power-path design allows your laptop and mobile devices to be charged at the same time through any of the USB3.1 type-A ports. The lightweight and compact spacedock is designed with an aluminium alloy body for rugged durability, slipping into your bag or pocket effortlessly so you can take it anywhere.
